RESEARCH SYNOPSIS:

Many effective interventions that improve clinical practice do not translate into meaningful outcomes that improve patient care. Due to this gap, both the National Institutes of Health and the Institute of Medicine have prioritized research that advances our knowledge of how evidence-based interventions can be effective in real-world settings. Guided by a dissemination and implementation science framework, the goal of my program of research is to improve patient care through evidence based behavioral interventions in the context of learning healthcare systems. My research aims to understand and intervene on factors that influence health outcomes among patients coping with problematic substance use, HIV/AIDS and other chronic/life-limiting illnesses and identify implementation strategies that improve patient care in real world settings.

Dr. Ennis serves as an active research mentor for Undergraduate Research Opportunity Program students and Medical Student Summer Research Fellowship Program students.

UF

Dr. Ennis currently serves as an active research mentor for pre-doctoral students in clinical health psychology and epidemiology.

She chaired both Master's Thesis and Doctoral Dissertations. In addition, Dr. Ennis successfully mentored students as they developed competitive research portfolios through publications and grantsmanship.

Dr. Ennis also served as a doctoral committee member for students in other departments in the College of Public Health and Health Professions, the College of Arts and Sciences, the College of Health Outcomes and Policy, and the College of Health and Human Performance.

Dr. Ennis provided research mentorship to pre-doctoral students completing their internship year in the Department of Clinical and Health Psychology.

She also provided research mentorship to undergraduate honors students as well as undergraduates who are engaging in independent research for credit (CLP 3911).

Attending Psychologist

Dr. Ennis trains and supervises pre-doctoral and postdoctoral students in the psychological evaluation and treatment of clinical patients.

Classroom Teaching (University of Florida)
